

Kaleeva Alina

QA Engineer

Profile

Detail-oriented QA Engineer with 5+ years of experience in manual, functional, and API testing of client-server web applications, VPN services, and financial blockchain projects. Successfully tested 8+ blockchain products, including crypto wallets, blockchain banking, online stores, and blockchain games built with React.js, React Native, Node.js, and MongoDB. Proven track record of building testing processes from scratch, which significantly improved overall product quality. Currently an integral part of the project support team, ensuring seamless releases and high-quality standards.

Employment History

BrainQ · QA Engineer

May 2024 – Present

- Conduct comprehensive functional and regression testing of client-server web applications and VPN services, ensuring high system reliability.
- Identify, document, and track software defects in Jira, collaborating closely with developers to accelerate bug resolution and prevent regressions.
- Execute API testing using Postman and perform mobile application testing via Android Studio to guarantee seamless cross-platform functionality.
- Act as a key member of the project support team, actively contributing to the establishment and continuous improvement of QA processes from scratch.

SCRUMP, Minsk · QA Engineer

June 2021 – April 2024

- Performed end-to-end functional and non-functional testing for complex client-server web applications.
- Designed, authored, and maintained comprehensive test documentation, including test cases and checklists, to maximize test coverage.
- Utilized Git for version control; cloned, configured, and ran applications locally using VS Code and Yarn to accurately reproduce complex edge-case scenarios.
- Conducted rigorous mobile testing on both real devices and Android Studio emulators to ensure optimal user experience across different platforms.
- Validated backend logic through API testing with Postman and maintained proactive communication with cross-functional development teams to ensure timely, high-quality releases.

Education

Belarus State Economic University | Minsk, Belarus

Specialization: Finance and Credit | September 2018 — July 2022

Courses & Certifications

- QA Engineering Course — IT Academy (StormNet) | May 2021 – Jun 2021
- Test Automation with Selenium and Python — Stepik.org | Nov 2022 – Present
- Corporate English Lessons | Ongoing
- Web Development (HTML, CSS) — Beonmax | 2020 – 2021
- Web Development (HTML, CSS) — IT Shuttle* | 2020 – 2021

Skills & Technologies

Testing Types:

Functional & Non-functional Testing, Manual Testing, API Testing, Regression & Smoke Testing, Client-Server Testing, Mobile Testing.

Tools & Software:

Postman, Jira, Chrome DevTools, Android Studio, Selenium IDE, Git, VS Code, Yarn.

Databases & Tech Stack:

SQL, MongoDB. Basic understanding of React.js, React Native, Node.js.

Methodologies &

Documentation:

Test Design Techniques, Test Cases & Checklists Creation, Agile/Scrum.

Automation (In Progress):

Python, Selenium WebDriver.

Language

English: B1+ (Intermediate)

Russian: Native

Hobbies

Music (playing multiple instruments, singing), regular fitness activities.
