Date of Birth: June 7, 2001

PROFILE

QA Engineer with 5+ years of experience in manual functional and API testing for client-server web applications, VPN services, and financial blockchain projects. Successfully delivered QA for 8 blockchain products (crypto wallets, DeFi banking, e-commerce, and blockchain games) built with React.js, React Native, TypeScript, and MongoDB. Proven expertise in building QA processes from scratch to significantly elevate product quality. Currently a core member of the product support team, driving seamless releases and ensuring stable, high-quality deliverables.

WORK EXPERIENCE

BrainQ — QA Engineer | *May 2024 – Present*

• Conduct comprehensive functional and regression testing of client-server web applications and VPN services, ensuring high system reliability.
• Identify, document, and track defects in Jira; collaborate closely with developers to accelerate bug fixes and prevent regressions.
• Perform API testing using Postman and mobile application testing via Android Studio to guarantee seamless cross-platform functionality.
• Leverage AI tools (ChatGPT, Claude Code) to generate and optimize test cases and checklists, analyze logs, and accelerate test documentation preparation.
• Develop and maintain automated tests using Playwright and TypeScript, expanding test coverage and reducing the volume of manual regression testing.
• Actively participate in building and continuously improving QA processes from scratch within the product support team.

Scramp LLC, Minsk — QA Engineer | *June 2021 – April 2024*

Tested financial blockchain projects (client and server sides). Successfully delivered QA for 8 internal blockchain projects: blockchain banking, crypto wallet, e-commerce platform, blockchain explorer, blockchain game, and corporate website. Stack: React.js, React Native, TypeScript; MongoDB databases.

• Conducted end-to-end functional and non-functional testing of complex client-server web applications.
• Designed, created, and maintained comprehensive test documentation (test cases, checklists) to maximize test coverage.
• Utilized Git for version control; cloned, configured, and ran applications locally via VS Code and Yarn to accurately reproduce complex edge cases.
• Performed thorough mobile testing on real devices and Android Studio emulators to ensure an optimal user experience across different platforms.
• Validated backend logic through API testing in Postman; maintained close collaboration with cross-functional development teams to ensure timely and high-quality releases.

SKILLS & TECHNOLOGIES

• **Testing Types:** Functional and non-functional testing, manual testing, API testing, regression and smoke testing, client-server and mobile application testing.
• **Tools:** Postman, Jira, Chrome DevTools, Android Studio, Git, VS Code, Yarn.
• **Automation:** Playwright, TypeScript.
• **AI-Assisted Testing:** ChatGPT, Claude Code (generation and optimization of test cases and checklists, log analysis, accelerated documentation preparation).
• **Databases:** SQL, MongoDB.
• **Tested Project Stack:** React.js, React Native, TypeScript.
• **Methodologies & Documentation:** Test design techniques, test case and checklist creation, Agile/Scrum.

EDUCATION

Belarusian State Economic University, Minsk
Specialization: Finance and Credit | September 2018 – July 2022

COURSES & CERTIFICATIONS

• **QA Engineering** — IT Academy (StormNet) | *May 2021 – June 2021*
• **Test Automation with Selenium and Python** — Stepik.org | *November 2022 – May 2023*

• **Corporate English Training** | *2021 – 2022*
• **Web Development (HTML, CSS)** — Beonmax | *2020 – 2021*
• **Web Development (HTML, CSS)** — IT Shuttle | *2020 – 2021*

ADDITIONAL INFORMATION

• **Languages:** Russian (Native), English (Intermediate, B1).
• **Interests:** Music (playing multiple instruments, vocals), fitness.
